

Ques: The geography of England helped in Bringing Industrial Revolution. Explain

Ans:- Industrial Revolution:- In Modern part of history, It is the Process of change from an agrarian and handicraft economy to one dominated by Industry & Machine Manufacturing.

Geography of England, a gift of God

Geographical factors

• Large Coast:- England is an Island having a large coast which helped in Maritime Activities

• Coal & Iron Reservoirs  
The England had vast reservoirs of coal & Iron which was Important for Industrial Revolution.

• Navigation Routes

The Navigation through Rivers & Canals were more developed with transported heavy raw material like coal & Iron.

• Infrastructure

Infrastructure was developed at early pace leading to the Railway in early 19th Century

• Industry

Due to isolationism from the Main land of Europe. England was free from disputes & conflicts.

• Agriculture Development

Because of 'Enclosure Movement' Agriculture was developed in 17th & 18th Century which aided the Industrial revolution by providing raw material.

Thus, Geography of England proved to be Boon for the Industries to be placed. As Industrial Revolution proved to be Boon as well as Bane for world. helped in Making <sup>things</sup> faster & the labour class was pissed off in this.
